# NATIONAL SAVINGS

# CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs 25,000 in them (inclusive of any Post Office cash certificates held).

© Full particulars obtainable from all post offices, District Organisers of Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla. ↑

**TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT.**

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 9th June 1951.—

## REMARKS

The figures of births and deaths shown in this statement for week ending the 9th June, 1951, relate to 200 towns with an estimated population of 26,368 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 85% of the total number of towns representing 91% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 14,431 and 8,550 representing birth and death rates of 28.5 and 16.9 per thousand of population respectively.

(A) *States (Parts A & C).*—The data here relate to 181 towns with an estimated population of 23,758 thousands. Information about Assam could not be included. The total numbers of towns is 202 and their population is 25,187 thousands. Thus 90% of the total number of towns representing 94% of the total population is covered. The numbers of births and deaths

recorded in these towns were 13,241 and 7,900 representing birth and death rates of 29.0 and 17.3 per thousand of population respectively. The table at the end gives the position by States.

Madras was the only town which had a high death rate of 50.9 per thousand of population and this high death rate was largely due to deaths from respiratory diseases and dysentery and diarrhoea.

(B) *States (Part B).*—The data here relate to 19 towns with an estimated population of 2,610 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 59% of the total number of towns representing 68% of total population is covered. The numbers of births and deaths recorded in these towns were 1,190 and 650 representing birth and death rates of 23.7 and 13.0 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
